A weather system moving across the Midwest and Great lakes spread snow across the Northern Great Lakes and some very light Freezing Rain and Drizzle across Iowa, Illinois and Wisconsin that caused a thin coating of ICE on most surfaces Wednesday evening and overnight into early Thursday morning. There was also some minor sleet and snow in some loaction in Northeast Illinois and Southern Wisconsin. Amounts were mostly less than 0.2 inch. Temperatures were in the 20s to near 30 degrees. Meteorologist: Tom Piazza, CCM

All details contained herein are made subject to the inherent limitations of the science of Meteorology. The data is based upon reports received from the National Weather Service and Cooperative Observers. Start and Stop times are taken from the nearest National Weather Service Observation Reporting Station. The data has been evaluated by our staff of professional meteorologists and determined to be accurate and representative of these locations. We do reserve the right to make changes to this report upon receipt of further meteorological data if we deem it necessary.
