Two (2) weather systems affected the region early Wednesday morning through Thursday morning. The first system arrived from the southwest spreading light to very light dry snow into the Northern IL and NW Indiana area Wednesday morning. This snow diminished to flurries or ended mid-day Wednesday. Most accumulations were a Trace to less than 1/2 inch. Temperatures were mainly in the teens. A second system moving from the Northwest with an associated cold front, spread light snow into the region later Wednesday afternoon that continued into Thursday morning. Amounts were 1 to 2 inches in Northern areas, mainly north of I-90 and less than an inch south. Winds caused minor drifting of the snow. Meteorologist: Tom Piazza, CCM
