For the first snow of the season, a strong arctic front moved south of the region on Saturday followed by a storm system that moved from Central IL into the OH River Valley. Rain spread into Northern IL and IN Saturday morning then became mixed with and changed to a period of wet snow later Saturday that ended early Saturday. Accumulations of 1-3 inches west of the Lakeshore and North of I-80 were common, with some isolated amounts of 3-4 inches. South of I-80 amounts were mostly a Trace to a few tenths of an inch. Accumulations were mostly on grass and elevated areas because of the warm pavement surfaces. Temperatures fell from the low 40s into the lower 30s by Sunday morning as unseasonably cold air rushed into the region. This storm system was followed by Lake Effect Snow in Eastern WI, NE IL, and northern IN later Sunday into Monday. Amounts for the Lake Snow will be captured in the event dated 11/10/25. Meteorologist: Tom Piazza, CCM
