A major storm system moving across the upper Midwest and Great Lakes brought mainly Rain to Northern Illinois and Indiana Tuesday through early Wednesday morning. The trailing arctic cold front moved through Wednesday morning and the rain changed to a period of wet snow before ending by mid-day. Accumulations were mainly less than one-half inch. Temperatures fell below freezing Wednesday afternoon and into the 20s during the evening causing any residual moisture, puddles and slushy snow to freeze into ice on untreated surfaces. Meteorologist: Tom Piazza, CCM
