A major winter Storm System moved from Missouri into Michigan on Sunday bringing rain to the region most of the day on Sunday. As it passed to the east a strong arctic cold front moved through the Southern Great Lakes causing temperatures to fall from the 50s and 60s into the 20s Sunday evening, continuing to fall into the single digits by Monday morning. This Storm System also caused several tornadoes in Illinois and Northwest Indiana. As the cold air poured into the region light snow spread into Northern Illinois and Northwest Indiana and continued into Monday morning bringing mainly less than an inch accumulation with a few 1-2 inch amounts. High winds gusting to 45-60 mph caused blowing and drifting of the snow. Meteorologist: Tom Piazza, CCM
