An upper air system moving south-southeast through the Great Lakes brought an arctic front through the region Wednesday morning that brought snowshowers to Northern Illinois and Northwest Indiana. Some of these were heavy that brought a quick 1-2 inches of snow in less than 2 hours. Temperatures rapidly fell from the 30s to the low to mid 20s. Lake effect snow continued in Northwest Indiana past this event into Thursday morning. Strong winds caused blowing and drifting snow. METEOROLOGIST: TOM PIAZZA, CCM
