A major storm system moving across the region brought heavy rains and thunderstorms, some severe with damaging winds, large hail and isolated tornadoes Tuesday into early Wednesday. As much colder air moved in early Wednesday the rain changed to wet snow. Accumulations were mainly confined to areas north of I-88 with less than an inch mainly on non-pavement areas. However, some slush buildup did occur on pavement before melting after the snow let up or ended. Temperatures were in the 30s. METEOROLOGIST: TOM PIAZZA, CCM
