THIS IS PART ONE OF THE SUPER STORM ACROSS THE GREAT LAKES SAT-TUE. A super storm system moved from Missouri into Northern Illinois and then into the Upper great Lakes Sunday and Monday. This storm rapidly intensified and brought heavy rains and thunderstorms, some severe with damaging winds Sunday. As it moved north of the region strong northwest winds brought much colder arctic air which changed the rain to snow later Sunday. There was some minor Freezing Rain during the changeover to snow. Blizzard conditions occurred in parts of Northern Illinois and most of Wisconsin. Snowfall amounts were difficult to measure due the severe blowing and drifting of the snow. The falling snow diminished to mainly flurries by mid-day Monday. Snowfall amounts ranged from 4-6 inches near the Wisconsin border to mainly less than 2 inches south of I-88. Temperatures quickly fell into the 20s and continued to fall into the Teens by late Monday. METEOROLOGIST: TOM PIAZZA, CCM
